A large, dark blue, irregular ink blot or splash is centered on a white background. The blot has a textured, grainy appearance with some lighter blue and white areas within it. Numerous small, dark blue ink droplets and splatters are scattered around the main blot, particularly towards the top and right edges.

Bots success

Does the bot easily solve the user's problem with the minimum number of steps?

Does the bot solve the user's problem better/easier/faster than any of the alternative experiences?

Does the bot run on the devices and platforms the user cares about?

Is the bot discoverable? Do the users naturally know what to do when using it?

A large, dark blue, textured splash or blotch on a white background. The splash has irregular, organic edges and a mottled, painterly texture. The text "Try it" is centered within the splash in a white, sans-serif font.
